# 75+ CONDITIONERS AND MASKS

*for Gorgeous Grays*

## What are the best conditioners and masks for gray curly hair?

Purple and blue conditioners deposit certain pigments onto hair that counteract brassiness and yellowing in gray (and colored) hair. Purple and blue are the exact opposite of yellow and orange, respectively, so by using a conditioner or mask specially formulated for gray hair, the yellow and orange undertones in hair are neutralized and canceled out. This makes grays look brighter and shiny.

## When would one start using a blue or purple conditioner?

This is a personal preference but generally if the grays or the left-over color looks yellow, blorange, brassy, or dull you could start using colored conditioners and masks.

## What is the difference in effect in blue versus a purple conditioner?

The pigments in each conditioner are different, so for brunettes the blue is best (because blue is the opposite of orange) and for blonds the purple is better (because purple is the opposite of yellow). So these conditioners and masks counteract the yellow and orange undertones to brighten the grays.

### **i** Tip

If you prefer your grays to look as white as possible (rather than shades of gray, wink wink), a clarifying (non-pigmented) shampoo is preferable because no pigments will be deposited onto the hair strands. Pigmented shampoos, conditioners and masks do put color molecules on top of the hair shaft.

**If you do not want the gray hairs to be so white, is there a shampoo or conditioner for that?**

Yes, many of the blue and purple shampoos and conditioners will give the grays a purplish hue because the pigment is so intense. But so does a temporary hair color like Manic Panic or Arctic Fox. Toning drops can also be used, by adding them to your favorite conditioner or deep conditioner. It depends on the conditioner you use, but the purple or blue pigments make the hair more silvery gray than white. So if that's what you prefer, a silvery gray, then by all means use one of the products in this guide.

**i Tip**

If you follow the CG method, look for those conditioners and masks that are indicated to be CG safe. Manufacturers often change ingredients in formulas so be sure to double-check them before buying. For each conditioner and mask, we have also indicated whether it contains aloe, coconut, and protein, or is good for hard water.

## Bonus

---

This Guide also contains toning drops, foams & rinses to create your own purple or blue conditioner and mask.

This Guide is by no means exhaustive but we hope the information provided will help you save both time and money on the road to gorgeous silvers. Give one of these special conditioners and masks a try for at least a few weeks to see the full results.
