GUIDE TO DETOXIFYING HAIR PRODUCTS

Introduction

Our hair and scalp are exposed to a multitude of environmental pollutants, styling products, oils, and chemical treatments which can leave our scalp itchy and inflamed, and our hair looking dull, lifeless, and damaged. Detox products are designed to revitalize locks and restore the hair's natural beauty. They are specifically formulated to also deeply cleanse the scalp, removing impurities and buildup that can hinder scalp health and allow the scalp to breathe. Detox products are suitable for a wide range of individuals who deal with different hair concerns.

Maintaining a balanced pH level is essential for a healthy scalp. The pH level of the scalp refers to its acidity or alkalinity. Detox products are formulated to restore or maintain the ideal pH level of the scalp, which is typically around pH 4.5 to 5.5.

Common ingredients found within detox hair products are activated charcoal, which has exceptional absorptive properties attracting and removing impurities and excess oils from product buildup and Bentonite Clay, which has high negative charge allowing it to bind to the positively charged toxins and impurities in your hair. Another common ingredient found in detox products is tea tree oil, which has antibacterial and antifungal properties leading to the elimination of dandruff and reduction of scalp irritation. Lastly, an acidic detox product is Apple Cider Vinegar as it is used to help maintain a balanced pH of the scalp. Together these ingredients aid in the revitalization of your hair.

After the use of detox products, it is important to do a regular scalp massage as it helps to stimulate blood circulation and promote a healthy scalp. Massaging allows for the distribution of natural oils and removal of any dead skin cells. Use a gentle soft scalp massager or your fingertips on the scalp in circular motions.

There are many detox products to choose from. This Guide mentions over 75. We have also indicated whether they contain protein, aloe, or coconut, are good for low density (thin) or high density (thick) hair, and if they are Curly Girl approved for those following the CG Method.

How To Use This Guide

There is a lot of information in the guide - don't get overwhelmed. We have done the work for you. All you need to do is:

1 - Take our Hair Quiz.

2 - Read the short introduction in the guide.

3 - Review the icons at the top of the guide.

4 - Check the icons underneath each product.

5 - Match the icons with those at the top of the guide.

6 - Select those products that match your hair characteristics.

For example, if your hair is thin or thinning (low density) look for products that are marked for low density hair.

7 - If you are allergic to certain ingredients, such as aloe or coconut, avoid products with those icons.

8 - If your hair is limp or damaged, pick products with the protein icon.
